

Bachelor in Computer Applications
Course Title: Probability and Statistics
Code No: CAST 202

## Tribhuvan University

Faculty of Humanities \& Social Sciences
OFFICE OF THE DEAN
2020

Semester: III

Full Marks: 60
Pass Marks: 24
Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

## Group B

Attempt any SIX questions.
$[6 \times 5=30]$
2. Write down the process of collecting primary data.
3. Determine First Quartile $\left(\mathrm{Q}_{1}\right) 7^{\text {th }}$ Decile $\left(\mathrm{D}_{7}\right)$ and $80^{\text {th }}$ Percentile $\left(\mathrm{P}_{80}\right)$ from the following data:

| Age in year | 10 | 12 | 14 | 16 | 18 | 20 | 22 | 24 | 26 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of people | 7 | 11 | 24 | 35 | 27 | 17 | 11 | 8 | 5 |

4. Calculate correlation coefficient between income and expenditure in foods of certain families of Kathmandu Metropolitan from the following information:

| Income (000Rs) | 10 | 11 | 12 | 13 | 14 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Expenditure in foods (000Rs) | 9 | 8 | 9 | 12 | 11 |

5. A box contains 50 items of which 20 are defectives. If one item is selected randomly from the box, what is the probability that it is a non-defective item?
6. What is sampling? The standard deviation of marks in an entrance exam of BCA students is 0.5 . How large a sampie must be taken in order to be $95 \%$ confidence that the error of his/her estimate will not exceed 0.01 .
7. Calculate the median and mode from following distribution:

| Expenditure(000Rs) | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of families | 7 | 12 | 15 | 13 | 8 | 5 |

8. A test was given to three candidates taken at random from three provinces of Nepal. The scores of candidates are given below:

| Gandaki | 9 | 7 | 6 |
| :---: | :---: | :---: | :---: |
| Lumbini | 7 | 4 | 5 |
| Bagmati | 6 | 5 | 6 |

Carry out one-way ANOVA.

## Group C

## Attempt any TWO questions.

[ $2 \times 10=20]$
9. From the following data, determine average marks of student, standard deviation and coefficient variation.

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ | $70-80$ | $80-90$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of people | 54 | 90 | 86 | 58 | 62 | 82 | 78 | 66 | 70 |

10. In a normal distribution with mean $=200$ and standard deviation $=20$, find the probability that
a) $\mathrm{P}(\mathrm{X}>180)$
b) $\mathrm{P}(\mathrm{X}<220)$
c) $\mathrm{P}(160<\mathrm{X}<240)$
d) $\mathrm{P}(\mathrm{X}>220)$
e) $10 \%$ values are less than what values of $X$ ?
11. Describe simple random sampling with a suitable example.
